

ABOUT US

Kodamera is a web development company specializing in open source with expertise in the implementation of all types of web projects.

We offer solutions for any size or purpose of project, from simple corporate sites to advanced systems for web-based applications.

OUR SERVICES

Our diverse and experienced team takes care of all the elements in the development of new sites and systems, providing tailor-made solutions with superior design and programming.

We offer:

- Web architecture and design
- Implementation
- Installation
- Support

DRUPAL CONTRIBUTIONS

Kodamera has contributed to the Drupal community in many ways:

Outreach - we market Drupal to our clients and other organisations in Sweden

As sponsors of DrupalCon Barcelona 2007 and DrupalCamp Stockholm 2009

By writing patches for contrib modules and core

By maintaining these modules:

- Video Filter (co-maintained by Blackdog)
- Twingly (maintained by Freakalis)
- Printfriendly (maintained by anon)
- Domain User Edit (maintained by Blackdog)
- Doman Node Options (maintained by Anon & Blackdog)

By being one of the maintainers of the Swedish Translation Project and the Swedish Translation Server
