## Urbanwood Design

[Home](#) › [Administer](#) › [Site building](#)  
**Modules**    [List](#)    [Uninstall](#)

No information is available about potential new releases for currently installed modules and themes. To check for updates, you may need to [run cron](#) or you can [check manually](#). Please note that checking for available updates can take a long time, so please be patient.

Modules are plugins that extend Drupal's core functionality. Enable modules by selecting the *Enabled* checkboxes below and clicking the *Save configuration* button. Once a module is enabled, new *permissions* may be available. To reduce server load, modules with their *Throttle* checkbox selected are temporarily disabled when your site becomes extremely busy. (Note that the *Throttle* checkbox is only available if the *Throttle* module is enabled.)

It is important that [update.php](#) is run every time a module is updated to a newer version.

You can find all administration tasks belonging to a particular module on the [administration by module page](#).

To extend the functionality of your site, a number of [contributed modules](#) are available.

To clear all caches, click the button on the [Performance page](#).

See the [available updates](#) page for information on installed modules and themes with new versions released.

### Administration

| Enabled                             | Name                | Version | Description                                                                                                                 |
|-------------------------------------|---------------------|---------|-----------------------------------------------------------------------------------------------------------------------------|
| <input checked="" type="checkbox"/> | Administration menu | 6.x-1.5 | Provides a dropdown menu to most administrative tasks and other common destinations (to users with the proper permissions). |

### CCK

| Enabled                             | Name                | Version | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
