Scanner Options

- Default: Case Sensitive Search Mode
- Default: Match Whole Word
- Default: Regular Expression Search
- Default: Search Published Nodes Only
- Rebuild Teasers on Replace

If this box is checked: The teasers for any nodes that are modified in a search-and-replace action will be rebuilt to reflect the replacements in other fields; you do not need to check any teaser fields for nodes in the "Fields" section below. If this box is unchecked: Teasers will remain untouched; you can select specific teaser fields below to include in search-and-replaces.

Allow restrictions by terms in a vocabulary:

- History
- Image Galleries
- My family and website
- Newsletter
- Website development
