<input type="checkbox"/>	<b>▼ Block</b>	
<input checked="" type="checkbox"/>	Block functionality	Add, edit and delete custom block. Configure and move a module-defined block.
<input checked="" type="checkbox"/>	Non default theme admin	Check the administer page for non default theme.
<input type="checkbox"/>	<b>▼ Blog</b>	
<input checked="" type="checkbox"/>	Blog functionality	Create, view, edit, delete, and change blog entries and verify its consistency in the database.
<input type="checkbox"/>	<b>▼ Blog API</b>	
<input checked="" type="checkbox"/>	Blog API functionality	Create, edit, and delete post; upload file; and set/get categories.
<input type="checkbox"/>	<b>▼ Book</b>	
<input checked="" type="checkbox"/>	Book functionality	Create a book, add pages, and test book interface.
<input type="checkbox"/>	<b>▼ Bootstrap</b>	
<input checked="" type="checkbox"/>	IP address and HTTP_HOST test	Get the IP address from the current visitor from the server variables, check hostname validation.
<input checked="" type="checkbox"/>	Page cache test	Enable the page cache, submit a HEAD request and examine headers.

<input type="checkbox"/>	<b>Test</b>	<b>Description</b>
<input checked="" type="checkbox"/>	Variable test	Make sure the variable system functions correctly.
<input checked="" type="checkbox"/>	Boot and exit hook invocation	Test that hook_boot() and hook_exit() are called correctly.
<input type="checkbox"/>	<b>▼ Cache</b>	
<input checked="" type="checkbox"/>	Cache saving test	Check our variables are saved and restored the right way.
<input checked="" type="checkbox"/>	Cache clear test	Check our clearing is done the proper way.
<input type="checkbox"/>	<b>▼ Comment</b>	
<input checked="" type="checkbox"/>	Comment interface	Test comment user interfaces.
<input checked="" type="checkbox"/>	Comment on a node page	Test comment form on a node page.
<input checked="" type="checkbox"/>	Comment on a node page	Test anonymous comments.
<input checked="" type="checkbox"/>	Comment approval	Test comment approval functionality.
<input type="checkbox"/>	<b>▼ Contact</b>	
<input checked="" type="checkbox"/>	Site-wide contact form	Tests site-wide contact form functionality.
<input checked="" type="checkbox"/>	Personal contact form	Tests personal contact form functionality.
<input type="checkbox"/>	<b>▼ Database</b>	
<input checked="" type="checkbox"/>	Connection tests	Tests of the core database system.
<input checked="" type="checkbox"/>	Fetch tests	Test the Database system's various fetch capabilities.
<input checked="" type="checkbox"/>	Fetch tests, part 2	Test the Database system's various fetch capabilities.
<input checked="" type="checkbox"/>	Insert tests	Test the Insert query builder.
<input checked="" type="checkbox"/>	Insert tests, LOB fields	Test the Insert query builder with LOB fields.
<input checked="" type="checkbox"/>	Insert tests, default fields	Test the Insert query builder with default values.
<input checked="" type="checkbox"/>	Update tests	Test the Update query builder.
<input checked="" type="checkbox"/>	Update tests, Complex	Test the Update query builder, complex queries.
<input checked="" type="checkbox"/>	Update tests, LOB	Test the Update query builder with LOB fields.

<input type="checkbox"/>	<b>Test</b>	<b>Description</b>
<input checked="" type="checkbox"/>	Delete tests	Test the Delete query builder.
<input checked="" type="checkbox"/>	Merge tests	Test the Merge query builder.
<input checked="" type="checkbox"/>	Select tests	Test the Select query builder.
<input checked="" type="checkbox"/>	Select tests, ordered	Test the Select query builder.
<input checked="" type="checkbox"/>	Select tests, complex	Test the Select query builder with more complex queries.
<input checked="" type="checkbox"/>	Query tagging tests	Test the tagging capabilities of the Select builder.
<input checked="" type="checkbox"/>	Query altering tests	Test the hook_query_alter capabilities of the Select builder.
<input checked="" type="checkbox"/>	Query altering tests, part 2	Test the hook_query_alter capabilities of the Select builder.
<input checked="" type="checkbox"/>	Regression tests	Regression tests cases for the database layer.
<input checked="" type="checkbox"/>	Query logging	Test the query logging facility.
<input checked="" type="checkbox"/>	Range query test	Test the Range query functionality.
<input checked="" type="checkbox"/>	Temporary query test	Test the temporary query functionality.
<input checked="" type="checkbox"/>	Schema API	Tests table creation and modification via the schema API.
<input type="checkbox"/>	<b>▼ DBLog</b>	
<input checked="" type="checkbox"/>	DBLog functionality	Generate events and verify dblog entries; verify user access to log reports based on permissions.
<input type="checkbox"/>	<b>▼ File</b>	
<input checked="" type="checkbox"/>	File validator tests	Tests the functions used to validate uploaded files.
<input checked="" type="checkbox"/>	Unmanaged file save data	Tests the unmanaged file save data function.
<input checked="" type="checkbox"/>	File uploading	Tests the file uploading functions.
<input checked="" type="checkbox"/>	File paths and directories	Tests operations dealing with directories.
<input checked="" type="checkbox"/>	File scan directory	Tests the file_scan_directory() function.
<input checked="" type="checkbox"/>	Unmanaged file delete	Tests the unmanaged file delete function.

<input type="checkbox"/>	<b>Test</b>	<b>Description</b>
<input checked="" type="checkbox"/>	Unmanaged file moving	Tests the unmanaged file move function.
<input checked="" type="checkbox"/>	Unmanaged file copying	Tests the unmanaged file copy function.
<input checked="" type="checkbox"/>	File delete	Tests the file delete function.
<input checked="" type="checkbox"/>	File moving	Tests the file move function.
<input checked="" type="checkbox"/>	File copying	Tests the file copy function.
<input checked="" type="checkbox"/>	File loading	Tests the file_load() function.
<input checked="" type="checkbox"/>	File saving	Tests the file_save() function.
<input checked="" type="checkbox"/>	File validate	Tests the file_validate() function.
<input checked="" type="checkbox"/>	File save data	Tests the file save data function.
<input type="checkbox"/>	<b>▼ Filter</b>	
<input checked="" type="checkbox"/>	Filter administration functionality	Thoroughly test the administrative interface of the filter module.
<input checked="" type="checkbox"/>	Core filters	Filter each filter individually: Convert URLs into links, Convert line breaks, Correct broken HTML, Escape all HTML, Limit allowed HTML tags.
<input type="checkbox"/>	<b>▼ Form API</b>	
<input checked="" type="checkbox"/>	Required field validation	Carriage returns, tabs, and spaces are not valid content for a required field.
<input type="checkbox"/>	<b>▼ Forum</b>	
<input checked="" type="checkbox"/>	Forum functionality	Create, view, edit, delete, and change forum entries and verify its consistency in the database.
<input type="checkbox"/>	<b>▼ Help</b>	
<input checked="" type="checkbox"/>	Help functionality	Verify help display and user access to help based on permissions.
<input type="checkbox"/>	<b>▼ Locale</b>	
<input checked="" type="checkbox"/>	String translate	Adds a new locale and translates its name
<input checked="" type="checkbox"/>	Translation import	Tests the importation of locale files.
<input type="checkbox"/>	<b>▼ Menu</b>	
<input checked="" type="checkbox"/>	Menu item	Add a custom menu, add menu items to the custom menu and Navigation menu, check their data, and delete them

<input type="checkbox"/>	<b>Test</b>	<b>Description</b>
	creation/deletion	using the menu module UI.
<input checked="" type="checkbox"/>	Hook menu tests	Test menu hook functionality.
<input checked="" type="checkbox"/>	Menu rebuild test	Test rebuilding of menu.
<input type="checkbox"/>	<b>▼ Node</b>	
<input checked="" type="checkbox"/>	Node revisions	Create a node with revisions and test viewing, reverting, and deleting revisions.
<input checked="" type="checkbox"/>	Node teaser	Test node_teaser() with different strings and lengths.
<input checked="" type="checkbox"/>	Node edit	Create a node and test node edit functionality.
<input checked="" type="checkbox"/>	Node preview	Test node preview functionality.
<input checked="" type="checkbox"/>	Node creation	Create a node and test saving it.
<input checked="" type="checkbox"/>	Node edit permissions	Create a node and test edit permissions.
<input checked="" type="checkbox"/>	Node title XSS filtering	Create a node with dangerous tags in its title and test that they are escaped.
<input type="checkbox"/>	<b>▼ Path</b>	
<input checked="" type="checkbox"/>	Path alias functionality	Add, edit, delete, and change alias and verify its consistency in the database.
<input checked="" type="checkbox"/>	Path aliases with translated nodes	Confirm that paths work with translated nodes
<input type="checkbox"/>	<b>▼ PHP</b>	
<input checked="" type="checkbox"/>	PHP filter functionality	Make sure that PHP filter properly evaluates PHP code when enabled.
<input checked="" type="checkbox"/>	PHP filter access check	Make sure that users who don't have access to the PHP filter can't see it.
<input type="checkbox"/>	<b>▼ Poll</b>	
<input checked="" type="checkbox"/>	Poll create	Adds "more choices", previews and creates a poll.
<input checked="" type="checkbox"/>	Poll vote	Vote on a poll
<input type="checkbox"/>	<b>▼ Profile</b>	
<input checked="" type="checkbox"/>	Test single fields	Testing profile module with add/edit/delete textfield, textarea, list, checkbox, and url fields into profile page
<input checked="" type="checkbox"/>	Test select field	Testing profile module with add/edit/delete a select field
<input checked="" type="checkbox"/>	Test date field	Testing profile module with add/edit/delete a date field

<input type="checkbox"/>	<b>Test</b>	<b>Description</b>
<input checked="" type="checkbox"/>	Test field weights	Testing profile modules weighting of fields
<input checked="" type="checkbox"/>	Autocompletion	Test profile fields with autocompletion.
<input type="checkbox"/>	<b>▼ Search</b>	
<input checked="" type="checkbox"/>	Search engine queries	Indexes content and queries it.
<input checked="" type="checkbox"/>	Bike shed	Tests the bike shed text on the no results page.
<input checked="" type="checkbox"/>	Advanced search form	Indexes content and tests the advanced search form.
<input checked="" type="checkbox"/>	Search engine ranking	Indexes content and tests ranking factors.
<input type="checkbox"/>	<b>▼ Session</b>	
<input checked="" type="checkbox"/>	Session tests	Drupal session handling tests.
<input type="checkbox"/>	<b>▼ SimpleTest</b>	
<input checked="" type="checkbox"/>	SimpleTest functionality	Test SimpleTest's web interface: check that the intended tests were run and ensure that test reports display the intended results. Also test SimpleTest's internal browser and API's both explicitly and implicitly.
<input type="checkbox"/>	<b>▼ Statistics</b>

Clean test environment

**Message****Group    Filename**

Remove tables with the prefix "simpletest" and temporary directories that are left over from tests that crashed. This is intended for developers when creating tests.

[Clean environment](#)
